* The acreage under crops dealt with in table A 3 is exclusive of the areas for which statistics are not available. † Includes Cow buffaloes.

(a) Area by Revenue survey, inclusive of feudatory and tributary States.
(b) Includes area irrigated from private canals.
(c) Includes area irrigated from Tanks and Wells.
(d) The difference between the total area irrigated (A 2 – 6) and the total area of crops irrigated (A 2—7) is due to the exhibition in the latter column of the area irrigated at both harvests.
(e) Includes the area under culturable waste other than fallow in Assam.
(f) Includes area irrigated from tanks.
(g) Not reported.
(h) Separate statistics not available.

in each Province of British India during the year 1891-92.

(i) Includes goats for the districts of Bellary, Anantpur, Madras, and Tanjore.
(j) Includes cows
(k) Included under "Bulls and Bullocks."
(l) Includes cow buffaloes and young stock.
(m) Included under male buffaloes.
(n) Includes goats.
(o) Included under sheep.
(p) Includes area under non-food crops.
(r) Includes 1,384 acres under miscellaneous crops in large istemrar villages, details of which are not given.
(s) Includes 50,160 acres of which details are not available.
(t) Includes cows for Punjab, Assam and Berar.
(u) Includes cow buffaloes for Punjab and cow buffaloes and young stock for Assam, and Berar
(w) Includes goats for Punjab, Assam, and Berar.

N.B. (1)—Statistics of stock entered under Bombay are exclusive of Sind, for which the information is not available.
(2)—Statistics of stock entered under Assam relate to six districts only, statistics for the remaining districts not being available.
(3).—The difference between the total areas shown under Bombay opposite columns (1) and (2-a) of table A 1 and the totals of district areas shown in the corresponding columns of the provincial table A 1 is due to the inclusion in the former table of the areas of feudatory and tributary States which are not shown under any districts in the latter table they being situated within the Presidency proper but outside limits of any British Districts and not in Political relation with the Foreign Department.
(4).—In the case of Madras the total of columns 1 to 5 of A 2 does not correspond with the area shown in column 4 of A 1. This has caused a corresponding difference in the figures entered in the column "Total."

* The return for Upper Burma relates to the year ending 31st March 1892.

† The previous year's classification has been modified under the recent conferral of proprietary (Malguzari) rights on certain muafidars in the district.

TABLE C—*continued.*

Incidence of the Land Revenue on Area and Population in the year ending 31st March 1892.

	Districts and class of tenure.	Total area by Survey, less feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates.	Balance of area fully assessed.	Total land revenue (excluding cesses) of district (column 2).	Population of district (column 2).	Land revenue per head of population (columns 5 and 6).	Land revenue assessed on fully assessed area (column 4).	Incidence of Land Revenue (column 8) on fully assessed area (column 4) per acre. For total area.	For cultivated area.	Population of fully assessed area.	Land revenue assessment per head of population of fully assessed area (columns 8 and 11).	Towns over 10,000 inhabitants. Number of towns.	Aggregate population.

The return for Coorg relates to the year ending 31st March 1892.
The return for Ajmere-Merwara relates to the year ending 30th June 1892.

* The return for the Mysore State relates to the revenue year of fifteen months ending 30th June 1892.
Returns for other Native States not available.

APPPENDIX.

Statements illustrative of the state of Tea, Coffee, Cinchona and Cotton cultivation in British India.

NOTE

Special statements showing the state of tea, coffee, cinchona, and cotton cultivation in India are for the first time appended to the Returns of Agricultural Statistics of British India. These statements were formerly incorporated in the Volume of "Statistical Tables relating to British India" annually published by the Government of India in the Department of Finance and Commerce. Their publication in that volume ceased in 1888, but the returns themselves were continued, and as they contain information of some interest, it has been decided to publish them as an appendix to the Agricultural Tables.

The present statements exhibit figures from the year the Department of Finance and Commerce ceased to publish them.

The statistics of area in these statements differ in many instances from those exhibited in Statement A, the reason being that the two sets of returns do not cover the same period, and the special returns include areas for which reliable statistics are not available.

Statement illustrative of the state of Tea cultivation

1888.

* Crop not harvested as the plant did not thrive.

† Owing to the gradual decrease in the yield of tea the six tea gardens shewn for Dacca in the return for 1890 were closed before the commencement of the season of 1891.

(a) Not distinguished as "Black" or "Green" in the local return.

(b) These plantations were not worked during the year.

(c) Of the seven plantations shown in the previous year five decayed, deterioration in fertility of the soil being assigned as the reason for it.

(d) Tea gardens have been abandoned.

(e) Figures for the Upper Chindwin district are more or less conjectural.

(f) Worked for only ⅓ths of the season; if fully worked the outturn would have been 3,900 lb or an approximate yield of 278 lb per acre.

(g) Incomplete.

* No information available.

† These totals represent only the figures given by the Planters. According to the village accounts they amount to 10,330 acres and 20,659,040 plants during 1888-89; 9,420 acres and 18,839,220 plants during 1889-90; and 10,992 acres and 21,983,460 plants during 1890-91.

(a) Planted amongst 23 acres of coffee and as avenues; those amongst the coffee have been abandoned, and are dying out

(b) This quantity is exclusive of 340,931 ℔ which is the outturn for South-East Wynaad, Nilgiri District, for which particulars are not given against each species.

(c) The cinchona plants have almost been abandoned and replaced by coffee plants, and have died out

(d) The increase over the figures of the previous years is due to the greater number of returns received from Planters during the year.

Statement showing the progress made in the cultivation of Cinchona in private plantations in India—contd.

TOTAL		444,002	40,254	.	289,215	8,214	50,350	..	57,828	(c) 158,502	498,067	51,506

(a) Cinchona is grown in the spaces between coffee trees in coffee estates, but does not occupy any ground which would otherwise be planted with coffee.
(b) The cultivation of cinchona has practically ceased in Coorg. The trees are in many places being uprooted, as their cultivation is not now remunerative, and as they have turned out to be injurious to coffee when they are planted as shade trees
(c) The increase from 50,350 in 1890-91 to 158,502 is due, not to any actual increase in the cultivation, but to the supply of more complete information from the planters concerned.
